Muhammad Usama Malik

Mern Stack Developer | AI/ML Enthusiast

Bank stop, Lahore, Punjab, Pakistan, 54770

Phone: +92 3028009515 | Email: **Muhammad Usama Malik** | **LinkedIn** | **My Portfolio** | **Github**

Key Skills

Languages: JavaScript, TypeScript, Python, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Redux Toolkit, Vite
Backend: Node.js, Express.js, REST APIs, JWT Auth
Database: MongoDB, Mongoose
AI / ML: Python, TensorFlow, PyTorch, Hugging Face Transformers, YOLO, OpenCV
Tools: Git, GitHub, VS Code, Postman

Summary

A passionate Full Stack Developer and AI/ML enthusiast based in Lahore, Pakistan. Experienced in building end-to-end web applications with React, Node.js, and MongoDB. Deeply interested in Artificial Intelligence — from fine-tuning image detection models with YOLO to experimenting with Hugging Face transformers. Committed to writing clean, maintainable code and building products that solve real-world problems.

Professional Experience

Senior Software Engineer (MERN Stack)
Nasmak Labs *(Full-Time)*
March 2024 – Present

- Leading the development of scalable mobile applications using React Native.
- Building and optimizing full-stack solutions with the MERN (MongoDB, Express.js, React, Node.js) stack.
- Collaborating with cross-functional teams to design, develop, and deploy high-performance applications.
- Implementing best practices for state management, API integrations, and performance optimization.
- Mentoring junior developers and conducting code reviews to ensure code quality and maintainability.

Software Engineer (React Intern)
MAldev Technologies *(Full-Time)*
January 2023 – February 2024

- Developed and implemented responsive React components to enhance user experience across various devices.
- Utilized React hooks and state management to improve application performance and interactivity.
- Collaborated with backend developers to seamlessly integrate RESTful APIs, optimizing data flow and functionality.

Projects

Portfolio Website — *Full Stack — React, Vite, Tailwind, Redux*

- Built a fully responsive personal portfolio with React, Vite, Tailwind CSS and Redux Toolkit.
- Integrated EmailJS for a fully functional contact form that sends messages directly to inbox.
- Implemented smooth scroll navigation, typewriter animation and mobile-responsive design.

Image Detection Model — *AI/ML — YOLO, PyTorch, OpenCV*

- Fine-tuned a YOLO model for custom object detection using transfer learning techniques.
- Trained on a custom dataset achieving high accuracy across multiple object categories.
- Built preprocessing pipeline with OpenCV for data augmentation and model evaluation.

Hugging Face NLP Model — *AI/ML — Python, Transformers, Hugging Face*

- Fine-tuned a pre-trained transformer model from Hugging Face for text classification tasks.
- Built a custom training pipeline with evaluation metrics and model checkpointing.

Full Stack MERN App — *Web — React, Node.js, MongoDB, Express*

- Developed a complete MERN stack application with JWT authentication and protected routes.
- Designed RESTful API with Express and MongoDB for efficient data management.
- Implemented responsive UI with React and Tailwind CSS for seamless user experience.

Education

Associate Degree Program in Artifical Intelegence
University Of Management And Technology, Lahore
November 2022 - July 2024

Intermediate in Computer Science
Superior Group Of Colleges, LHR
March 2020 - August 2022

Matriculation
GM School of Sciences, LHR
February 2018 - August 2019
